

The Swampscott Renewable Energy Committee Presents:

# **A COMMUNITY FORUM**

on

## **Leadership in Energy and Environmental Design (LEED®)**

**Learn how to bring energy efficient, sustainable, and environmentally responsible design and construction to Swampscott!**

**WEDNESDAY, MARCH 26<sup>th</sup> at 7:00 P.M.**  
**Upper Sanctuary, Temporary Town Hall, 837 Humphrey St.**

**Who Should Attend:** Everyone! Residents, Town Officials, Town Committee Members, Homeowners, Contractors, anyone who is interested in learning more!

**What We'll Talk About:** The presentation will explain what LEED building design and construction is, and how it relates to financial savings and environmental stewardship for the Town of Swampscott. We'll learn how design standards have evolved to incorporate LEED principles into everyday design, and we'll see examples of the design principles.

**Our Presenters:** S E A Consultants, Inc., an engineering and architectural firm that is currently working on sewer, water tower and roadway infrastructure improvements in Town.

### **What is LEED?**

The Leadership in Energy and Environmental Design (LEED) Green Building Rating System™ encourages sustainable green building and development practices through the creation and implementation of universally understood and accepted tools and performance criteria. LEED is the nationally accepted benchmark for the design, construction and operation of high performance green buildings. LEED promotes a whole-building approach to sustainability by recognizing performance in five key areas of human and environmental health: sustainable site development, water savings, energy efficiency, materials selection and indoor environmental quality.
